

CONTENTS

PART 1

LUIS H. GALLARDO, OLIVIER RAHAVANDRAINY	
Characterization of Sporadic perfect polynomials over $\mathbb{F}_2$	7
MICHIEL KOSTERS	
Images of polynomial maps on ample fields	23
ISAO KIUCHI, MAKOTO MINAMIDE	
Mean square formula for the double zeta-function	31
MARKUS SCHWAGENSCHIEDT	
Nonvanishing and central critical values of twisted L -functions of cusp forms on average	45
SUNIL CHETTY	
Arithmetic local constants for abelian varieties with extra endomorphisms	59
EIRA J. SCOURFIELD	
Exact divisors of polynomials with prime variable	83
ANDREW NILES	
The Picard groups of the stacks $\mathcal{Y}_0(2)$ and $\mathcal{Y}_0(3)$	105
ABDELMEJID BAYAD, MOHAND OUAMAR HERNANE, ALAIN TOGBÉ	
On extended Eulerian numbers	113
ROGER BAKER	
Small fractional parts of polynomials	131

PART 2

ABDULLAH MIR, AJAZ WANI	
Polynomials with polar derivatives	139
GREG MARTIN, WINNIE MIAO	
abc triples	145
ADRIAN W. DUDEK	
An explicit result for primes between cubes	177

KAZUHITO KOZUKA

Counting lattice points in certain rational polytopes
and generalized Dedekind sums 199

KEVIN MCGOWN, ENRIQUE TREVIÑO, TIM TRUDGIAN

Resolving Grosswald's conjecture on GRH 215

TAKUYA OKAMOTO, TOMOKAZU ONOZUKA

Functional equation for the Mordell-Tornheim multiple zeta-function 227

WILLIAM D. BANKS, KONSTANTIN A. MAKAROV

Convolutions with probability distributions, zeros of L -functions,
and the least quadratic nonresidue 243
