

CONTENTS

PART 1

ALAN ADOLPHSON, STEVEN SPERBER	
On integrality properties of hypergeometric series	7
OLIVIER RAMARÉ	
Accurate computations of Euler products over primes in arithmetic progressions	33
YANGCHENG LI, YONG ZHANG	
Rational triangle pairs and cyclic quadrilateral pairs with areas and perimeters in certain proportions	47
SUMUKHA S, SUJEET KUMAR SINGH	
Rankin–Cohen brackets on Hermitian Jacobi forms and the adjoint of some linear maps	61
HERISH ABDULLAH, ANDAM ALI MUSTAFA, FRANCESCO PAPPALARDI	
Density of the quasi r -rank Artin problem	73
SANKHADIP ROY	
Walsh transforms of trace forms with three or more terms and some maximal Artin–Schreier curves	95
DINAKAR RAMAKRISHNAN, LIYANG YANG	
A constraint for twist equivalence of cusp forms on $GL(n)$	105
WENGUANG ZHAI	
On a generalization of the Euler totient function	119

PART 2

ISTVÁN GAÁL	
Calculating “small” solutions of inhomogeneous relative Thue inequalities	141
YOSHIAKI OKUMURA	
Parametrization of virtually K -rational Drinfeld modules of rank two	157

QINGFENG SUN, HUI WANG	
A subconvex bound for twisted L -functions	175
PETER BRUIN, MAARTEN DERICKX, MICHAEL STOLL	
Elliptic curves with a point of order 13 defined over cyclic cubic fields	191
YOSHINORI HAMAHATA	
P -adic approximation of Dedekind sums in function fields	199
JUDIT MÍNGUEZ CENICEROS, JUAN L. VARONA	
Asymptotic behavior of Bernoulli-Dunkl and Euler-Dunkl polynomials and their zeros	211
WEI ZHANG	
On squares in Piatetski-Shapiro sequences	227
KUNIHIRO ITO	
Analytic continuation of multi-variable Arakawa-Kaneko zeta function for positive indices and its values at positive integers	237
MIN HO LEE	
Heat operators on modular and quasimodular polynomials	255
